Table C4 explanatory notes:

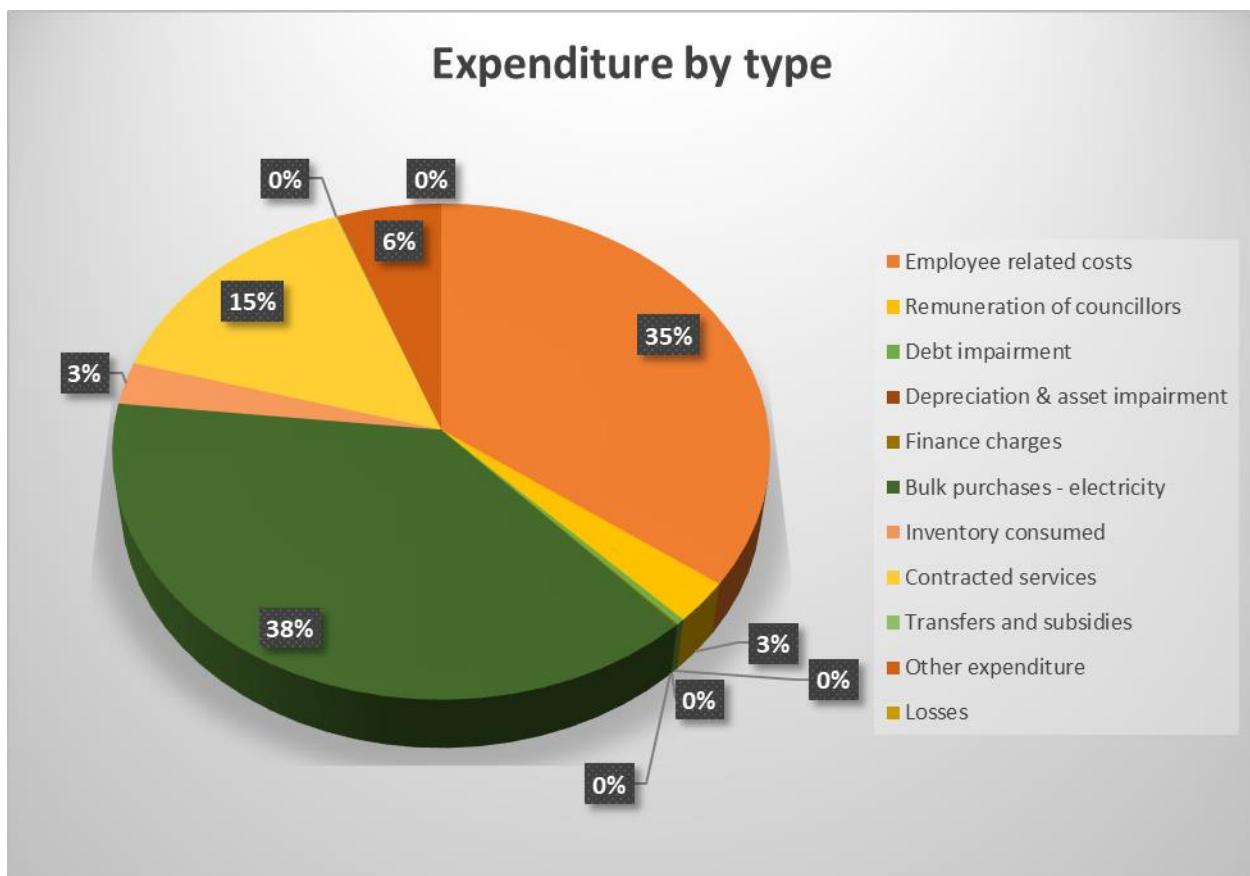

Total operating revenue to date is R549.9 million from the budgeted target of R515 million. The year to date variance is 7% above when performance is measured against the budget. A significant portion of this variance can be attributed to the fact that the municipality has properties that were billed annually in July. However, when the billing of these properties is apportioned manually on monthly basis the municipality records only -3% variance on the property rates as at end March 2023. Total operating expenditure which is accumulated from July 2022 is 388 million which 27% is less than the budgeted amount of R530.6 million. A major portion of this variance is a result of the debt impairment and depreciation being calculated at year end only and not during the year. The municipality is still trying to further reduce spending as much as possible, but not to the detriment of service delivery, only to stabilise the cash flow position of the municipality.

Income by Type

In the 3rd quarter transfers and subsidies are the highest followed by service charges-electricity revenue and property rates.

Expenditure by Type

As at 31st March 2023 Bulk purchases are the highest followed by employee related costs and contracted services.

Table C5 shows information for Capital Expenditure. Total expenditure at the end of quarter three is 73.7 million, which is 20% less than the budgeted year-to-date amount of 92.6 million. This can be attributed to the fact that municipality just received Disaster Recovery Grant of R76.9 million during the adjustment budget and is yet to start spending it. There has also been underspending of INEP due to some technicalities with Eskom and also the EEDSM Grant due challenges with SCM processes.
